Trina Solar to participate as a speaker at the *International Congress on Energy Efficiency and Renewable Energy Sources in Bulgaria*

Barcelona, 31st March 2008

The international manufacturer of solar modules Trina Solar will be participating as a speaker on the fourth edition of the *Energy Efficiency and Renewable Energy Sources* conference which will be held from 7th to 10th April in Sofia, Bulgaria.

Mr. Arturo Herrero, Vice-President of Sales & Marketing of Trina Solar, will be doing a speech on the competitive advantages that an integrated business model offers in the PV sector. This kind of business model means that the company manufactures in its own facilities the whole production chain from the ingots, to the wafers, cells and modules.

Participating in this congress is an important opportunity for Trina Solar, since it will allow the company to establish some first contacts in this emerging market and to continue extending its presence in Europe, where the company already counts with positive brand recognition.

For further information on this congress, please check the event's website: <http://www.viaexpo.com/congress-ee-vei/eng/congress.php>

About Trina Solar Limited

Trina Solar Limited (NYSE: TSL - News), through its wholly-owned subsidiary Changzhou Trina Solar Energy Co. Ltd, is a well recognized manufacturer of high quality modules and has a long history as a solar PV pioneer since it was founded in 1997 as a system installation company. Trina Solar is currently one of the few PV manufactures that has developed a vertically integrated business model from the production of monocrystalline ingots, wafers and cells to the assembly of high quality modules. This integrated value chain helps to ensure that high quality products can be delivered to its end customers around the globe, including a number of European countries, such as Germany, Spain and Italy. Trina Solar's solar modules provide reliable and environmentally- friendly electric power for residential, commercial, industrial and other applications worldwide. Trina Solar successfully completed its initial public offering on the New York Stock Exchange in December 2006 and its ADSs are traded under the ticker symbol TSL. For further information, please visit Trina Solar's website at <http://www.trinasolar.com>.
